Section E Comments:

Mbr lives alone and have family that are supportive. PA provides care during the week. Mbr spends time with family and friends, talks on the phone and watches TV for relaxation. No other major life stressors reported in the last 90 days.

Section F: Functional Status

Section F Comments:

Member is a 94 y/o Filipino American Tagalog-speaking female. Member residing daughter & family, in a 3-bedroom private house with 12 steps to access. Member dx with OA, CAD, HTN & a hx of Lung Ca in remission. The conditions cause the member to experience symptoms of fatigue, and pain on occasion. Member requires contact guidance when ambulating without cane while touching on to walls & furniture indoors and then guided by person with assistance outdoors. Member also requires contact guidance with upper body dressing and personal hygiene. Member requires contact guidance when using the toilet and transferring. Member requires some weight bearing support with bathing and lower body dressing. Due to poor endurance, member minimally participates in cooking/housekeeping and is mostly dependent on others for these tasks. The member also needs assistance opening medication bottles as well as medication reminders to ensure compliance. The member's family live nearby and can assist as needed. DME: Cane, Shower chair.

Section G: Continence

Section G Comments:

Mbr is continent to bladder and bowel. Mbr has no issues with traveling to and from the bathroom when needed with ambulation device. RN educated on inspecting skin daily and keeping skin clean

and dry and frequent changes to prevent skin breakdown. Educated regarding timed voiding, restricting fluids in the evening & signs and symptoms of UTI's and prevention measures. Mbr verbalized understanding of conversation.

Section H: Disease Diagnoses

Section H Comments:

Mbr's diagnosis and prescriptions are appropriate as confirmed by mbr's medical records. Mbr is compliant with all medication and treatment regimen. Physician communication to reconcile medications and diagnosis.

Section I: Health Conditions

Section I Comments:

No reported falls in the past 90 days. RN educated with safety measures to prevent falls in home by keeping hallway well lit, removing slippery rugs & areas, wearing not skid socks & removing loose wires. Mbr observed without an approved cane to slow moving ambulation and resting periodically by sitting down on chair due to fatigue. Mbr has no hx of SOB. Mbr reports no pain in the last 3 days, pain managed with analgesics along with rest & relaxation.

Section J: Nutritional

Section J Comments:

Mbr has no chewing and/or swallowing difficulties. Mbr is on a regular diet, 2-3 grams sodium, low fat, low cholesterol, high fiber, NAS, no concentrated sweets, regular consistency diet. Mbr has no dramatic weight loss or increase in weight reported in the last 90 days.

Section K: Medications/Allergies

Section K Comments:

Member able to administer medication, PA provide reminders to ensure compliance.

Section L: Treatments/Procedures

Section L Comments:

Member has no hospitalizations, ER visits and no Nursing home stays within the last 90 days. RN provided education to mbr/CG of difference between ER and Urgent care. Urgent care can be considered as PCP visit, as it involves non life-threatening conditions for instance diarrhea, back pain, joint sprain, common cold- anything with non-underlying chronic conditions. ER is for serious issues that might be life-threatening. A visit to the ER for Chest pain can be lifesaving. Waiting time in Urgent care is way less than ER. Mbr / CG was educated in the benefits of preventative care, such as better mental health, improved quality of life, and enhanced medical care after diagnosis. Once the diagnosis is in place, better treatment is a part of follow-up care having established a history and baselines via preventative care. PCP: Dr. Rakesh Gupta, MD 718-464-5225, 9033 Springfield Blvd, Queens Village, NY 11428. Last visit: 12/01/23. Preventative exams: Eye Exam: 10/01/2023. Hearing: 1/14/2023. Dental: 10/01/2023. Flu Vaccine: 09/01/2023. Pneumovax: 10/20/2023 After 65 years old. Colonoscopy: Not within 5 Years. Covid 19 Vaccine & boosters were administered 10/16/2023. Urgent care utilization education provided. RN educated Member on the importance of preventative treatments and screenings. Mbr / CG verbalized understanding of conversation.

Section M: Social Supports

Section M Comments:

EC/HCP: daughter Teresa Isada 954-270 5108 & daughter Cecelia Schamisso 917-509-1863. Mbr lives alone, with family involvement when needed.
